

# Specialised Protection

***hand guns to containers.....***

## **New Ferro Foil™**

Australian inhibitor a niche market research and development packaging specialist has just introduced onto the Australian market a new VCI (Vapour Corrosion Inhibitor) laminate that combines tough BOPP laminated film to foil with the inclusion of inside VCI actives in low density film, to assist in the prevention of corrosion of metal products either in storage or transshipped overseas. This specialist material can be made into bags of any size eg 100mm x 100mm up to bags to house aeroplane parts, gun turrets, machinery of any size. Australian Inhibitor is a major supplier to local manufacturing machinery exporters as well as Auto, Military and Mining Companies.

Australian inhibitor established over 50 years ago is a world leader in patented award winning designed VCI rigid plastic products, VCI flexible films and related rust preventative products.
