

MM70 STANDARD VCI PAPER

**AUSTRALIAN
INHIBITOR**

MM70 NON-LAMINATED , MULTIMETAL VCI PAPER
ECONOMICAL TO USE
EASY TO INSTALL
FOR PROTECTION OF METAL COMPONENTS
70 GSM NATURAL KRAFT PAPER BASE

Australian Inhibitors VCI MM70
Non-Laminated or standard paper exhibits exceptional strength and tear resistance. Our VCI technology ensures goods wrapped in or protected by this product are not affected by corrosion.

MM70 Non-Laminated Paper

| PHYSICAL PROPERTIES | VALUE | TEST METHOD |
|---------------------------------|-----------------|-------------|
| Weight of base paper (gsm) | 75 GSM \pm 5% | T-410 |
| Elmendorf Tear DIRI | 1285 | T-410 |
| Burst Factor | 60 | T-410 |
| VCI Coating | 8-12 GSM | T-410 |
| CORROSION PREVENTION PROPERTIES | | |
| Corrosion prevention test | PASS | MIL-3420 |

Goods wrapped in Australian Inhibitors VCI papers are protected from corrosion.
Our papers are heavily impregnated with a rust preventative VCI. This rust inhibitor migrates from the paper ensuring micro moisture located on the wrapped products are neutralised.
The saturation of VCI in conjunction with the unique ability for VCI to migrate to the surfaces requiring protection ensures corrosion cannot occur in the vicinity of our VCI paper.

ESTIMATED PROTECTION PERIOD
1-2+ Years

VCI papers are used to protect components that require high shelf life and protection against corrosion. VCI vapours migrate to hard to reach areas. Effective in humid conditions eliminating the need to spray or dip components

APPLICATIONS:

For protection of metallic or non-metallic components.

Coils and CR sheets.

Storage in open, warehousing and related systems

USAGE:

All substrates should be clean and contaminant free before MM70 standard paper is applied.

PACKAGING AND STORAGE:

Store in a cool dry place. Keep MM70 standard paper sealed when not in use.

**Unsurpassed Corrosion
Prevention for
60+ years**
