

PMG TRIPLE GUARD VCI FILM

**AUSTRALIAN
INHIBITOR**

*Premium Metal Guard VCI Triple Guard film offers
Proven Australian Inhibitor corrosion prevention chemistry.
Fulfil the requirements of MIL-PRF-22019*

- Strong & Tear resistant
- High Multidirectional shrink properties
- Triple layer construction offers targeted VCI protection.
- UV stabilised
- Wide sheet widths
- Heat sealable.

PMG Triple Guard is a safe, effective, corrosion inhibitor (VCI) film designed to protect multi-metals during in-process manufacturing, transport and indoor storage.

The proprietary corrosion inhibitors in PMG Triple Guard polyethylene film provide long-term protection in the vapour and contact phase against the corrosive effects of moisture, salt and other contaminants. This film is opaque, strong, tear-resistant, UV stabilised and heat shrinkable the contact face is a unique shade of blue identifying it as a quality product of Australian Inhibitor.

ESTIMATED PROTECTION PERIOD
2+ Years

PMG Triple Guard film is used to protect components that require high shelf life and protection against corrosion. VCI vapours migrate to hard to reach areas. Effective in humid conditions eliminating the need to spray or dip components

PMG TRIPLE GUARD FILM

METAL	LEVEL OF PROTECTION
Steel, AISI1010	Protected
Cast Iron	Protected
Brass, red or white	Protected
Bronze, including Naval	Protected
Copper	Protected
Cadmium and Cadmium Plated	Protected
Stainless Steel, All Grades	Protected
Zinc or White metal	Protected
Galvanised, hot dipped or Electro plated	Protected
Chromium and Chromium plated	Protected
Nickel and Nickel plated	Protected
Tinplate	Protected

Co-extruded three layer shrink film. 100% virgin resins, 200um Thickness

Available in:

1200/2400. 1600/3200, 1600 opening to 5.0m

APPLICATIONS:

For the protection of an array of metals, both ferrous and non-ferrous and their alloys

Large machinery and equipment.

Storage in open, warehousing and related systems

USAGE:

All substrates should be clean and contaminant free before PMG Triple Guard film is applied.

PACKAGING AND STORAGE:

Store in a cool dry place. Keep PMG Triple Guard sealed when not in use.

**Unsurpassed Corrosion
Prevention for
60+ years**
